Author **i** : Show exact matches only
E.g., smith E.g., j.l.

Affiliation:
E.g., university of toronto

Subject Areas **i**

- Life Sciences
- Physical Sciences
- Health Sciences
- Social Sciences & Humanities

To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)
